Mahindra
Rise.

A FRESH NEW LOOK WHILE MAINTAINING A TOUGH SIGNATURE STANCE.

The Mahindra PikUp's clean, contemporary lines improve the look of the vehicle while maintaining a tough signature stance. The most compelling changes are to the front of the Mahindra PikUp, where the grille, headlights, bonnet and foglamps have all undergone a substantial redesign.

The new grille design is smarter, utilising a glossy black finish with subtle chrome accents (S10 Models), as well as a more prominent Mahindra badge, while the lower air intake has been reshaped to provide a stronger visual integration with the grille. Black mesh inserts are consistently applied to both the main grille and the lower air intake, creating a more consistent appearance.

DRIVETRAIN POWER AND EFFICIENCY

The Next Generation PikUp has an updated 2.2-litre four-cylinder mHawk turbo diesel engine which make use of a variable geometry turbocharger to produce 103kw. The impressive torque peak of 330 Nm is reached at just 1600rpm, and sustained to 2800 rpm, ensuring excellent in-gear acceleration and great towing power.

The turbo diesel engine is linked to a six-speed manual gearbox driving the rear wheels, with 4x4 transmission with low range.

The entire range of the Next Generation Mahindra PikUp are fitted with a Eaton MLD (Mechanical Locking Differential) as standard.

Eaton Diff-Lock.

You're knee deep in muck and don't know what to do. Thankfully, the Mahindra PikUp does.

It comes equipped with Eaton's state-of-the-art mechanical locking differential system. The system reacts to the wheel speed differences and automatically locks the rear axle.

The result: you keep going non-stop over sand, snow, muck, ice, rocks or whatever.

ESP with Hill Hold

Drive safe even in the most gruelling conditions thanks to next generation electronic stability control.

THE NEW AGE STYLE

The spacious cabin of the Next Generation PikUp has undergone important upgrades as part of the new model line-up. Perhaps the most obvious improvements are the upholstery and the large six-inch (6"), full colour touch screen display on the S10 Double Cab models located in the centre console.

Taking Control

The Mahindra PikUp's cabin is also comprehensively equipped. As the flagship model of the range, the S10 Double Cab benefits from useful features such as remote central locking, cruise control, satellite navigation, reverse camera and a multi-function steering wheel.

The upgrade doesn't end here. With smart features like auto wipers and intelligent headlamps the vehicle promises to take the customer experience to the next level of comfort and performance.

Fully Automatic Climate Control (S10 variants) plus a reduction in vehicle engine noise and cabin noise intrusion, provides more comfort for all passengers.

COMMITMENT TO SAFETY AND COMFORT

The Next Generation PiKUp re-affirms our commitment to the safety and comfort of both front and rear seat passengers.

Safety features like ABS, EBD, Dual airbags, Crash protection crumple zones and Collapsible steering column are standard features.

Strengthening our commitment to safety and comfort, we have added head rests and 3-point lap sash seat belts for all seats along with two ISOFIX anchors in the rear seat with three top tether points for all Double Cab models.

Fully Automatic Climate Control

Our Fully Automatic Climate Control system (S10 variants) automatically selects the correct blend of conditioned and/or heated air that will, as quickly as possible, raise or lower the interior temperature from its current level to the temperature set for optimal comfort.

Futuristic Instrument Cluster

Drive into the future with a 3D effect cluster design which is stunningly illuminated for optimal visability.

SPECIFICATION LEVELS S6 AND S10 MODELS

FEATURES	S6	S10
Wheels	Steel with Plastic Covers	16" Alloys
Audio Head Unit	Mp3/Radio/CD	6in touch screen with Sat Nav, Reverse Camera and Bluetooth Mp3/Radio/CD
