Volkswagen R-Line –

Australian Media Launch, Victoria, October 2014

In brief

› R-Line – brief summary **04 ›**

› Pricing **08 ›**

Important:

All the data and descriptions included in this press folder are valid for the programme of models available for sale in Australia. Different details may apply in other countries. This information may be subject to change or correction.

The terms TSI, TDI and DSG are protected Volkswagen AG trademarks or the trademarks of other companies belonging to the Volkswagen Group in Germany.

Volkswagen expands R-Line range to include Golf Wagon and Tiguan

Joining the Golf, Beetle and Touareg R-Line models, Volkswagen Australia has expanded its lineup of R-Line vehicles to include Golf Wagon and Tiguan models.

While the trademark R-Line styling is visually present in every R-Line model, each iteration in the range has its own unique specification. In the case of Golf, Golf Wagon, Beetle and Tiguan, an R-Line package is available as an option on specific models within the range; however also available in the Tiguan and Touareg ranges are standalone R-Line models, offering enhanced performance with higher-output engines. In this case a 155 kW TSI engine in the Tiguan, and a 250 kW V8 TDI in the Touareg.

Adding unique R-Line-specific equipment on top of the already impressive lists of standard features in each model range, the Golf, Golf Wagon, Beetle, Tiguan and Touareg R-Line vehicles offer customers further levels of customisation with a host of practical and stylish enhancements.

Golf and Golf Wagon with optional R-Line package

Volkswagen's multi-award-winning icon now receives an R-Line optional package in both hatch and wagon models. This builds on the already premium levels of standard equipment of the Highline Golf models (103TSI and 110TDI) with the inclusion of unique 18-inch 'Salvador' alloy wheels, R-Line steering wheel with paddle shifters, R-Line interior trim complete with sport seats with R-Line badging, stainless steel pedals and sports suspension. Both hatch and wagon models also receive R-Line exterior body styling including rear spoiler, front and rear bumpers and side sills. Progressive steering is another feature of the Golf and Golf Wagon R-Line models offering a noticeably more direct and agile steering response in dynamic driving situations.

Beetle with optional R-Line package

The iconic Beetle also benefits from an optional R-Line package raising the level of equipment above the standard vehicle in both manual and DSG transmissions.

The Beetle R-Line package includes all the hallmark visual cues of an R-Line model, including unique front and rear bumpers, 18-inch 'Twister' alloy wheels and R-Line badging. Completing the package inside are gearshift paddles behind the steering wheel (DSG models), sports instrumentation on the dashboard which display the boost pressure, oil temperature and a stopwatch, adding a unique touch to the Beetle's R-Line package fit-out. As with all models in the R-Line range, the Beetle also comes with tinted rear glass.

Tiguan 155TSI R-Line

At the very peak of the revised Tiguan range, the 155 kW TSI-powered Tiguan R-Line sits as a standalone model within the Tiguan family. On top of a high-output petrol engine, the Tiguan R-Line also receives all the signature R-Line styling, including front and rear bumpers, 18-inch 'Mallory' alloy wheels and interior trim with unique R-Line steering wheel with gearshift paddles and front door sill plates. Adding further sporting credentials to the Tiguan R-Line is the inclusion of Adaptive Chassis Control, allowing customers to select the type of drive they require for their current environment.

Tiguan with optional R-Line package

Tiguan customers also have the opportunity to enhance their 132TSI or 130TDI Tiguan with an optional R-Line package. This includes all of the same features as the pinnacle Tiguan R-Line, with the exception of Adaptive Chassis control, replaced instead with sports suspension and leather seats replaced by comfort sports Alcantara/ cloth upholstery.

Touareg R-Line

The original Australian model in the R-Line range is the Touareg V8 TDI R-Line with 4MOTION all-wheel drive. The V8 TDI R-Line offers a more dynamic exterior look with unique R-Line design bumpers, oval tailpipes and is equipped with a powerful yet efficient 4.2-litre V8 turbo diesel engine.

Exterior features include a textured “matt black” diffuser and oval tailpipes, which are integrated into the redesigned bumper section. Finishing the look at the rear is a custom roof edge spoiler. The front also features a new spoiler lip in R-Line design and completing the exterior look are 21-inch ‘Mallory’ alloy wheels and dark tinted rear side windows and rear window.

Inside the Touareg V8, the R-Line logo features on the front stainless steel door sill plates and on the heated leather rimmed multi-function steering wheel with gear shift paddles. Rounding out the stylish design are stainless steel pedals and a leather gear shift knob with aluminium inserts.

In addition, the Touareg V8 TDI also comes with Comfort Package and Driver Assistance Package (except Lane Assist) as standard adding even further value and safety to an already highly equipped car. The Comfort Package consists of a four-zone automatic climate control dual-air conditioning system, electrically adjustable door mirrors with memory function, automatic kerb view function when reversing, electrically adjustable front seats with three position memory function for driver and front passenger (electrically height and reach adjustable), along with a heated steering wheel with memory and keyless entry.

The Driver Assistance Package includes Volkswagen’s innovative safety systems which include Adaptive Cruise Control (ACC) with Front Assist function and City Emergency brake (City EB) function, Side Assist (lane changing assistant) and the proactive occupant protection system.

Fitted with nine airbags, ASR, EDL and ESP with active rollover protection function, EBC and Off-road Function with Anti-lock Braking System (ABSplus) and Hill Decent Assist as standard and combined with the Driver Assistance Package, the V8 Touareg truly offers class leading safety.
